# Manada Conservancy Winter News 2021

## THE PERILS OF PLASTIC

Plastic pollution in the world’s oceans has been publicized widely; we’ve heard about the “Great Pacific Garbage Patch.” Lesser known is the prevalence of micro-

plastics in freshwater systems, which are conduits from land to the sea.

Dr. Sherri Mason, cutting-edge plastic pollution re-

searcher and Sustainability Coordinator at Penn State Erie, will present an overview of what plastic is, its proliferation in our society, and its emergence as one of the most prominent environmental pollutants. Join us for this virtual education program!

**February 25, 7:00 pm**

Karen Haldeman

Dear Friends,

The last few months have caused me to think a lot about connections—how important they are, and what else unravels when they break down. When you can't see your own family members or your friends, you realize even more how important your connections to them are. When your solace becomes a walk in the woods, you elevate your connection to the forest.

There are all different kinds of connections: the sharing of ideas between people, the connections of people with their surroundings, the way trees communicate underground, the way ocean currents and air currents affect our lives, and the way migrating birds help to stitch the global ecosystem together. In other words, the interdependence of pretty much everything. Another example is the network of nerves and vessels that make our own bodies whole and functional.

Even our small conservancy is like a little capillary, connected to a much larger network of conservancies, watershed groups, and environmental agencies, from local to global. The mutual exchange keeps our organization healthy. We are part of our own community and also of a world community, and each property we protect is part of the earth's vital network of wildlands that must be maintained to keep our planet healthy and whole.

Capillaries are very important. None of the larger vessels can do their job without that fundamental connection to every little cell and the exchange that they provide. Think of them as the grass roots of a person, and the metaphor follows. At a water quality workshop once, I heard the smallest tributaries described as being like capillaries, the ones that have the most impact on the health of a river. At a farm conference I learned that farmers need a critical mass of agricultural lands nearby to remain viable. We need each other, every single one.

I have some hope for this next year. Through all the tragedy and challenges we've had recently, I believe that the value of working together, supporting each other, connecting and re-connecting has floated back to the top of our consciousness. And I think we'll keep it there, and maybe patch some holes, connect back with each other, and sew together some wholeness. I'm hoping we can all work together to keep connecting both our personal landscapes and our natural ones.

## ***“Everything We Believe In”*** **...another 89 woodland acres preserved!**

by Jen Dunlap

Surrounded by a forest full of chestnut oak, sassafras, and mountain laurel, and the fresh mountain air at Chuck and Brenda Witmer’s property in Jefferson Township, you would never know that the world is enduring a pandemic. Despite this time of social distancing, the Witmer family, Manada Conservancy, and the Ward Burton Wildlife Foundation were able to work cooperatively, with a little help from Zoom, to permanently protect 89 acres of woodland.

Completion of this conservation easement project marks another success for Fort Indiantown Gap’s Army Compatible Use Buffer (ACUB) program that seeks to preserve high priority conservation land near military facilities in an effort to avoid nearby uses that would be incompatible with their training. FIG’s need

for dark skies and limited development around the military base mesh with our priority to protect land on the Kittatinny Ridge and surrounding area due to its high conservation value. In Brenda Witmer’s words, “It’s everything we believe in,” aware that they are both furthering a conservation mission and a military mission.

As development pressure never seems to cease, preserving this land not only helps to protect the water quality of Clarks Creek but also ensures a reprieve for the black bear, deer, bobcat, and many other species that call this area home. Contiguous with another Manada Conservancy preserved property,

this project helps to fulfill our goal of piecing together a corridor of protected land on the Kittatinny Ridge, recognized around the globe as an important migratory flyway and climate resilient landscape.

Thank you, Chuck and Brenda Witmer, for your partnership in preservation!

## ***Phase 2 of the Pronio Farm is permanently protected!***

by Jen Dunlap

We are pleased to share with you that, at the very end of 2020, we were able to add another 12 acres to the protected portion of the Pronio family farm. In 2016, we worked with the Pronio family to take the first step in preserving their farm by placing a conservation easement on 27 acres of land with high conservation value. While taking a phased approach, the family’s goal is to protect the entire 145-acre farm. The property straddles the East Hanover - West Hanover municipal boundary and is not far from the rapid development taking place along Route 39. Preserving this bucolic farm ensures that the land will be available for wildlife habitat and agricultural use into the future, and that the open space and scenic value the farm provides may be appreciated for generations to come.

Both a tributary to the Manada Creek and a portion of the Horse-Shoe Trail traverse the property. Not far from the Kittatinny Ridge (locally known as Blue Mountain) the property is a haven for migrating songbirds and serves as supporting landscape for migrating raptors to rest and feed.

Many thanks to the Pronio Family for their partnership in preservation and continued support of Manada Conservancy. Read more about the Pronio family and their history with the farm on the next page.

## A Preservation Love Story

by Lorna Pronio Thomas

The history of the Pronio farm is in many ways a love story.

Vince and Ronnie Pronio lived happily in Hershey, raising four children and running the family business. But Ronnie's love of horses, which began at an early age, continued into adulthood. She shared her love of horses with her children, and eventually a pony was purchased and boarded at Cassel's farm near Hanoverdale. When a property nearby became available, Vince and Ronnie both thought it would be a great idea to buy the property but not for the same reason. Vince viewed the 150-acre farm as a good investment while Ronnie envisioned it as the perfect home for a stable full of horses.

Over the next 5 years, the farm was transformed: dilapidated farm buildings were torn down, split rail fencing installed, a horse barn built, and horses acquired. Ronnie's dreams had come true! Though Vince had no desire to leave Hershey and live permanently on the farm, Ronnie and the children eventually wore him down, and the family took up permanent residence in the remodeled farmhouse in 1974.

Over the next several decades, the road from Hershey to the Village of Hanoverdale changed dramatically. Family farms were sold and developments sprang up and included townhouses, strip malls and

hotels. While at one time there was little traffic and no need for traffic signals, Route 39 eventually became a main road with multiple

traffic signals. When the Pronios purchased the family farm, it was just one of many in the area, but eventually it became unique in its being untouched by development.

Ironically, Vince, who had purchased the farm as an investment, grew to love the farm and the lifestyle it afforded him. The abundance of wildlife and the beauty of the land are just a couple of the reasons he fell in love with the property. Many attractive offers to purchase the farm were extended over the years, but Vince and Ronnie adamantly declined. In fact, Vince and Ronnie's love for the farm motivated them to work with Manada Conservancy in order to protect the farm from future development.

When Ronnie proposed to move back to Hershey in the 1990's, Vince refused, and he remained on the farm till his dying day. Ronnie continues to live on the farm, and she is working with Manada Conservancy to ensure that the farm will be forever protected.

To watch a short video about what preserving the family farm means to the Pronio family, please visit [www.manada.org/preservation](http://www.manada.org/preservation). Thanks to Gabe Pyszka, owner of Created on Purpose video productions, for working with us to create this video. More about Gabe's work can be found at <https://createdonpurposepa.com>.

## Program Updates

### 2021 Event Dates

*As we all learned during 2020, the best laid plans are subject to change. The dates below are current as of press time, but please check our website for up-to-date program changes and additions at [www.manada.org/events](http://www.manada.org/events)*

**April 8, 7pm** “Native Plants in Your Landscape,” virtual educational program featuring a panel of Manada’s own native plant experts!

**April 20** Last day to place orders for spring native plant sale

**May 1** Spring Native Plant Sale pick-up date (Boro Park, Hummelstown)

**September 30** “Forest Health and Climate Change” education program (details available in the summer newsletter)

*Thanks to our education program sponsor!*

### You can still take a Walk in Penn’s Woods

The recording of our virtual Walk in Penn’s Woods on the Stony Valley rail-trail occurred on a spectacular fall day and is now available on our website at [www.manada.org/education/resources/](http://www.manada.org/education/resources/). The 25-minute video is full of the history and the beautiful scenery of our local mountains and valleys.

Special thanks to Steve Bernardi of the PA Game Commission for his informative and engaging discussion of habitat management in our region’s state game lands woods. Thank you to the Dauphin County Woodland Owners’ Association for setting up the program and especially to Mike and Glenda Thomas (President and Secretary), Debbie Everly (Vice President), Sally & Rich Zaino, and Lindsey Glessner. Reese the dog also enjoyed the walk in the woods with us.

### Kids’

### Korner

Welcome to this new regular feature for kids! In the Kids’ Korner, we will share interesting ideas and programs that teach about the world we share with plants and animals.

Below is a link to a video about plants that adults can watch with their favorite kiddos. It is about 45 minutes long and has lots of ideas for you to try on your own! We hope you have fun together. Send a picture of one of your projects to us at [office@manada.org](mailto:office@manada.org).

<https://extension.psu.edu/growing-gardeners-plant-parts-tops-bottoms-and-middles>

Could you use some help integrating native plants into your home landscape? Through Manada Conservancy’s **Gardening for Nature** program, you can schedule a consultation with our experienced native plant consultant, Laurie Crawford. She will visit your property, discuss your goals, and prepare a suggested landscape design specific to your property. Plan now to take advantage of our spring native plant sale! Email Laurie at [garden-ingfornature@manada.org](mailto:garden-ingfornature@manada.org).

*Details about services and fees can be found at [www.manada.org](http://www.manada.org). A portion of the Gardening for Nature consultation fee helps Manada Conservancy to further our mission of land conservation, environmental education, and community engagement.*

## Boy Scout Builds Information Kiosk at Cladel Preserve

by Anita Pritchett

Thanks to a partnership between Manada Conservancy and Scouts BSA Troop 200, the Cladel Preserve now has a kiosk to bring more notice to this idyllic space. Logan Holley of Troop 200 worked with our Stewardship Director, Mark Vibbert, to complete his Eagle Project this fall, notwithstanding delays and new planning elements brought on by the Covid-19 pandemic.

Logan led the planning and execution of the project which involved other Scout and Manada Conservancy volunteers for a total of 189 hours of work over 5 months. He appreciated having an outdoor project to work on and hopes that the kiosk will let more people know they can visit the preserve and enjoy nature here. The Cladel Preserve is open to the public and is located across from 412 South Meadow Lane, Hummelstown.

As part of his project requirements, Logan solicited contributions for the kiosk materials and installation equipment. Because the kiosk was completed under budget, Logan plans to donate the remainder of his Eagle project funds to Manada Conservancy. Thank you, Logan!

## Jen Dunlap Earns Landscape Professional Certification

Congratulations to our Executive Director, Jennifer Dunlap, who recently completed the Chesapeake Bay Landscape Professional certification program. Administered by the Chesapeake Conservation Landscaping Council, the CBLP certification is a voluntary credential system for professionals who design, install, and maintain sustainable landscapes. The training involves classes or webinars and hands-on workshops about best management practices such as conservation landscaping, rainwater harvesting, stormwater infiltration practices, and how to perform site assessments. The training is followed with an exam, and the accrual of continuing education credits is needed to maintain certification.

Jen will be using the knowledge gained through this program to further Manada Conservancy's Swatara Greenway Stewardship program in which we organize riparian plantings along the Swatara Creek, work with local landowners and townships to promote creek-side stewardship, and partner with fellow organizations to improve the local watershed and that of the greater Chesapeake Bay. A key component of this work is utilizing native plants to create and enhance habitat and support native pollinators and other wildlife, another core aspect of Manada Conservancy's conservation efforts.

To learn more about the Chesapeake Bay Landscape Professional certification program or to find a certified professional, visit <https://cblpro.org/>.

*Enrich your home habitat by planting natives!*  
**21st Annual Spring Native Plant Sale**

*Online ordering February 1- April 20*  
*In-person Pick-up May 1 at Boro Park, Hummelstown*

## Board of Directors News

### Farewell with gratitude: A founder leaves the Board

Those of us who have been here from the beginning remember sitting around a kitchen table with Nancy Cladel, who kept saying, “We need to start a land trust.” She said it until we listened, and that’s how Manada Conservancy began. Then, a few years later, she spearheaded the annual Native Plant Sale, which has grown and evolved to not just a sale but—with many enthusiastic volunteers—a Native Plant Initiative and one of Manada Conservancy’s signature programs.

Nancy has served on our Board of Directors since 1997 when the Conservancy became a non-profit organization. Nancy and her husband Chuck are Partners in Preservation through their property donation of the Cladel Preserve in East Hanover Township. Their homestead is also preserved with an easement.

Nancy will remain on our Administration Committee as we do our strategic planning and will remain active on the Native Plant Sale Committee.

Nancy and her visions have been part of the foundation of our now successful organization. Though we regretfully say farewell to her participation on our Board, we are very grateful for all that she has contributed to make the world a better place, to preserve the resources of our local community, and to create wildlife habitat in our own back yards. Thank you, Nancy!

### Meet our new Board member, Annette Mathes!

Annette became our newest Director at the November Board meeting. She is a Certified Public Accountant, recently retired from Pennsylvania’s State System of Higher Education, where she served as Controller. She has been very active in leadership positions with the Appalachian Audubon Chapter. She has also held board positions with the Central PA Conservancy, the PA Chestnut Foundation, and the PA Society for Ornithology.

Annette loves to garden and create native habitat for wildlife. She was the Dauphin County compiler for PSO’s PA Birds Journal for two years and is still active with that organization as a Christmas Bird Count compiler. She enjoys watching and listening to opera. She brings enthusiasm and deep experience, and we are delighted that she is joining our Board of Directors. Welcome Annette!

### In other Board news...

Tom Abendroth replaces Nancy Cladel as the Board’s Vice-President. And after many years as Board Secretary, Bobbie Boyer has turned over those duties to Anthea Stebbins. Thanks to you all!

*Board and staff gather via Zoom for the December Board meeting*

# Thank You!

**Thank you to these recent volunteers!**

*You've monitored properties while wearing masks. You've met via Zoom to plan programs. You've stuffed envelopes from home.... Thanks for being so flexible during this last year! We hope to recognize all our volunteers when it's safe to be together again.*

***We've lost a friend...***

We were sorry to learn of the passing of Art Schiavo, longtime Conservancy member, avid bird-watcher, and cheerful soul. Art took up bird-watching later in his life, and as with other things, he embraced it with energy. His enthusiasm and excitement—as he added new birds to his Life List—was contagious. He was an early partner in helping to take care of our Clawson Preserve along the Swatara Creek, and then of course stayed to note what birds were enjoying the habitat there. Our thoughts are with Art's friends and family. Thank you to those who have donated in his memory.

***Workplace giving opportunity***

Does your employer offer charitable giving opportunities through payroll pledges? Manada Conservancy participates in EarthShare PA, an umbrella network of over 60 non-profits working together to ensure a healthy and sustainable environment. State employees can participate through PA's State Employee Combined Appeal; federal employees can participate through the Combined Federal Campaign. Some private companies also offer payroll giving options.

Employees can contribute specifically to Manada Conservancy via EarthShare or give to the umbrella organization (EarthShare) with a portion coming to the Conservancy. Check with the human resources department at your workplace to see if they participate or to suggest they do so.

**Mission Statement**

Manada Conservancy is a land trust dedicated to preserving the natural, historic, agricultural, and scenic resources of Dauphin County through land conservation, environmental education, and community engagement.

*Manada Conservancy is a member supported organization.*

# Thank you for your support in 2020! Now on to 2021.....

We are deeply grateful to each of you who have renewed your membership, bought Footprints on our Pathway to Preservation, contributed, or participated in online giving opportunities. It has been an immense help.

We have welcomed some of you to our new membership categories, and several have indicated that you have included Manada Conservancy in your long-term financial planning. Thank you! We have also received generous donations to our Endowment Fund, which will help ensure our success for years to come.

We deeply appreciate your support in 2020 and are looking forward to another year of land preservation and education programs. If you haven't yet renewed your membership, please use the coupon below or renew online. We hope some of you will take advantage of our new student membership option! If you have already renewed, thank you!

### You asked...

A number of you have indicated that you are leaving us a legacy and have asked exactly how to word a bequest. It is very simple: merely designate an amount or a proportion of your estate, in your will, for Manada Conservancy. If you would like to direct your bequest to our Endowment, where it may generate income for us in perpetuity, please include a statement (either to us or in your will) indicating your intent that the money specifically go to the Manada Conservancy Endowment Fund. That's all it takes! Thank you.

### Did you know...?

that we have now made it easy to donate gifts of appreciated stocks directly to Manada Conservancy? Such gifts might reduce your federal taxes. If you would like to know more, please contact Rich Zaino at rzaino@manada.org, or call him at (717) 645-2407.

## **Manada Conservancy President Receives Conservationist Award**

*by Anne Wain*

Congratulations to our own Sally Zaino, who recently received the Pennsylvania Forestry Association’s Mira Lloyd Dock Outstanding Woman Conservationist Award for 2020. This award recognizes exceptional 21<sup>st</sup> century woman conservationists whose actions echo and perpetuate Mira’s powerful and unique legacy.

The PFA saw in Sally “a respected and proven leader in the conservation community where she demonstrates the ability to work constructively with partners, government, and community organizations,” and “a true friend of the forest and land.”

Sally felt “incredibly honored to be singled out” by the Dauphin County Woodland Owners Association (who nominated her) and the PFA. She believes that the award speaks to “the many people working every day for conservation and protection of our natural resources... and to the immense value of partnerships.” DCWOA President Mike Thomas praised Sally’s efforts “to educate the public about the wonderful natural resources that surround us, and how to care for and sustain those gifts for future generations.”

*Mike Thomas presents plaque to Sally*

Sally received a plaque as well as a gift of live trees valued at \$5,000, which will help the Conservancy create and expand restoration efforts along the Swatara Creek and other waterways in Dauphin County.
